Teaching & Learning Framework

The Bishop Tyrrell Anglican College Teaching & Learning Framework provides a roadmap which aligns our core values and educational goals with our classroom practice, ensuring meaningful learning growth for every student.

Engage
Inspire
Ignite

Holistic
Our learners develop powerful learning dispositions as the gateway to deep knowledge and academic mastery.

Aligned
We align our P-12 continuum across four distinct sub-schools to precisely match the developmental needs of our learners at every key milestone.

Intentional
We prioritise evidence-based teaching practices which are informed by educational neuroscience.

Inclusive
We meet learners at their individual point of challenge to ensure high expectations and learning growth for all students.

Values-Based
We cultivate the character, voice and personal growth of every student, inspired by a commitment to service and the values of our shared faith.

Preschool

Wonder, Exploration & Growth

In the early years, the focus is on creating a warm, supportive environment where children's natural curiosity is nurtured through hands-on, child-led experiences.

Through purposeful play, children learn to navigate new environments, developing early independence and confidence.

Children are introduced to the school's core Learning Power dispositions, such as curiosity and thinking, to set them up for future success.

Junior School

Strong Foundations, Confidence & Connections

As students move into Junior School, the focus shifts to helping them feel secure, capable, and excited about the academic world around them.

Students gain confidence in daily school routines, developing the comfort and security needed to master core literacy and numeracy skills, establishing a strong foundation for future academic success.

Children explore their talents and interests through broad, dynamic pathways in the arts and physical education, with the opportunity to practise our Learning Power dispositions in a range of settings.

Middle School

Independence, Collaboration & Real-World Purpose

The Middle School years are filled with vibrant, hands-on experiences that support emerging teenagers as they build a deeper understanding of themselves and the world.

There is a strong focus on ensuring learning is authentic, requiring students to expand and apply their core literacy and numeracy skills.

Young adolescents learn to take greater responsibility for their own schoolwork, actively drawing on and strengthening their Learning Power dispositions.

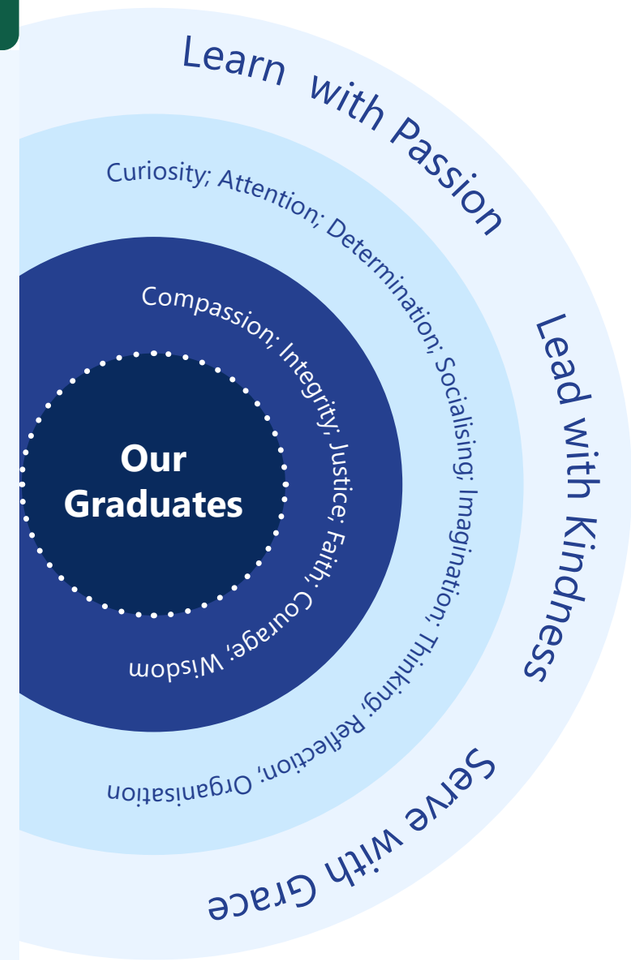
Senior School

Academic Mastery, Autonomy & Personal Aspirations

In the final years of school, students are treated as independent young adults, focusing on deep academic mastery and preparing for their unique futures.

Students dive deeply into their chosen specialised fields, experiencing rigorous, high-level learning that prepares them for life beyond school.

Students independently draw upon the full suite of Learning Power dispositions they have developed over their school life, such as reflection and organisation, to achieve sustained growth and personal success.



Our Mission:
To engage, inspire and ignite young hearts and minds to flourish because of what we do, inspired by the way of Jesus.
